

# CASE STUDY – 10EQS CrowdSourced Team Augmentation

## Mining Maintenance Activity Validation

### BACKGROUND

- A 10EQS professional services client was working with a leading mining company to identify and organize maintenance activities for fixed and mobile assets.
- The client asked 10EQS to help identify and engage qualified mining experts to verify and validate their understanding of maintenance activities required for specific equipment.

### 10EQS APPROACH

- 10EQS crowdsourced experts with a deep maintenance background in the mining industry to directly collaborate with the client:
  - Consultant, Maintenance Operations
  - Consultant, Maintenance Strategy and Machinery Replacement

### KEY STATS

**Project Type:** Team Augmentation

**Delivery:** 1 week

**Team:** 1 Expert Recruiter, 2 Experts/Advisors

### RESULTS

- Industry experts recruited by 10EQS provided virtual support to the client by reviewing the existing maintenance strategy and verifying a detailed list of preventative and corrective maintenance activities.
